

BRM/BTM Training (3day course/2day course)

We offer BRM/BTM (Bridge Resource Management/Bridge Team Management) training, which is designed to enhance safe navigation by recognizing all crew, objects, and information on the ship's bridge as resources and utilizing them effectively as a team. By taking on their respective roles "such as Captain, Officer, or Helmsman" participants gain an understanding of the responsibilities required for each position. Additionally, by considering optimal teamwork from different perspectives, they develop effective collaboration methods as a team. In the aviation industry, CRM (Cockpit Resource Management) training is mandatory for Pilots once a year. Similarly, in the maritime industry, some companies have made BRM/BTM training a mandatory requirement for board
